HEPATITIS B VACCINATIONS REQUIRED FOR OCCUPATIONAL HEALTH REASONS

Asplands Medical Centre is able to offer an occupational health service for all registered patients who require to be vaccinated for their employed role. This service is not part of core National Health Services and therefore a charge will be made to the patient's employer.

Each patient will require a maximum of 3 appointments and the total cost including all blood tests, vaccinations and advice is £120.00 and we ask that this payment be made in advance of the first appointment. Any Boosters after the initial 3 vaccinations will cost £40.00 each.

Please collect a letter from reception to give to your employer to obtain permission from them in advance for their agreement to cover the cost of this service. Only once your employer has signed this form and it has been returned to us with payment, will you be able to make an appointment.
